STAT

Specjalizacja Polskich Portow Morskich is a report of the discussions of the Scientific Conference of the Maritime Commission of the Baltic Institute held 14-15 June 1946 in Bydgoszcz. It lists members of the Commission and all who took part in the conference, with their affiliation. Detailed information and figures are given on planned division of labor among Polish ports, railroads connecting ports with coal mines, etc., including double-track lines, number of trains running daily on ~~perspective~~ specified lines, transshipment capacity, loading installations, volume of imports and exports, prewar storage capacity at specific ports, damage and reconstruction, port expansion projects; coal production, exports, and consumption; inland waterways, transshipment and storage capacity for liquid fuels, etc. Estimates for future to 1950, sometimes 1955. Comparative prewar statistics.
